

SD1

DEFENSE STANDARDIZATION PROGRAM

STANDARDIZATION DIRECTORY

(FSC Class and Area Assignments)

REVISED AS OF

1 January 2004

SDMP

FOREWORD

The Standardization Directory (SD-1) provides the following information:

A list of all DoD Standardization Management Activities (SMA), which includes:

Addresses, telephone and fax numbers, e-mail addresses, and points of contact.

The SMA's areas of document interest by Federal Supply Class (FSC) or Standardization Area

The SMA's item reduction Study interest by FSC.

SD-1 Code Assignment.

A list of civilian agency standardization offices, which includes:

Addresses, telephone and fax numbers, e-mail addresses, and points of contact.

The civil agency's areas of interest by FSC or Standardization Area.

SD-1 Code Assignment.

Assignments of Lead Standardization Activities and Participating Activities by FSC and Standardization Area.

A list of Federal Supply Groups (FSG), FSC's, and Standardization Areas, and definitions for the Areas.

Data Item Description (DID) Approval Authorities.

Changes to this Directory are marked with an asterisk to indicate changes from the last issue. Previous editions of this Directory are hereby superseded.

This Directory is published three times a year—in January, May, and September. Each standardization management activity shall send **non-routine** changes (changes which add or delete standardization codes, FSCs, AREAs, or any changes in areas of responsibility) to the appropriate office listed below. The offices below, after any required coordination with DSPO (such as transfers of responsibility between Services/Agencies), will forward the changes to the DoDSSP, 700 Robbins Avenue, Building 4D, Attn: SD-1 Administrator, Philadelphia, PA 19111-5095. Changes are due at the DoDSSP by the end of December, April, and August.

****** UPDATE ON ASSIST SD-1 MODULE ******

Individuals in standardization management activities who have been given access to make routine-only changes (address, phone, fax, e-mail changes) may do so via the ASSIST SD-1 Module. See the DSPO memorandum at www.dsp.dla.mil/policy/SD-1memo.htm for more information. Routine-only changes may be made directly to the SD-1 database via the ASSIST SD-1 module by those who have been given access to do so through their DepSO.

Those who do not have access to the ASSIST SD-1 module and who wish to make routine-only changes, may do so by e-mailing those changes to Eileen Brady at the DoDSSP at: eileen.brady@dla.mil by phone at (215) 697-9494, DSN 442-9494; or by fax at (215) 697-2247, DSN 442-2247.

Standardization Activity

Send changes to:

GENERAL DEFINITIONS

Departmental Standardization Office (DepSO). A top level office in each Military Department or Defense Agency responsible for managing the Defense Standardization Program and ensuring that its Lead Standardization Activities and Standardization Management Activities properly implement the policies, procedures, and goals of the Defense Standardization Program.

FSG, FSC, and Area Codes. Federal Supply Group (FSG), Federal Supply Class (FSC), and Standardization Area codes. For a more complete description of FSGs and FSCs, see Cataloging Handbook H2-1, Federal Supply Classification, Part 1, Groups and Classes.

Item Reduction Activity. An activity responsible for conducting item reduction studies in accordance with DoD 4120.24M.

Lead Standardization Activity (LSA). The activity responsible for managing DoD standardization efforts in an Area or Federal Supply Class.

Non-Government Standards Body. A private sector association, organization, or technical society that plans, develops, establishes, maintains, or coordinates private sector standards, specifications, and other types of standardization documents.

Participating Activity. The activity designated by its DepSO to represent the department in interdepartmental standardization efforts.

Standardization Area. A standardization category that encompasses a broad engineering discipline, practice, and manufacturing technology and is not susceptible to categorizing in the Federal Supply Classification system.

Standardization Management Activity (SMA). A generic term to describe any organization listed in the SD-1 that functions as a Lead Standardization Activity, Preparing Activity, Participating Activity, Military Coordinating Activity, Custodian, Review Activity, Adopting Activity, or Item Reduction Activity.

STANDARDIZATION AREA CODES AND DESCRIPTIONS

Established Standardization Areas are listed below. Area descriptions are provided as guidance in categorizing documents not susceptible to categorizing in the Federal Supply Classification system.

<u>AREA</u>	<u>TITLE (AREA Description Below Title)</u>
ADMN	<p>Administrative Data</p> <p>This area covers non-technical data required by contracting officers and other personnel for the Government administration of the overall provisions of the contract, excluding management and financial data. As a minimum, the following subjects are covered: (1) security system engineering; military history, responsibilities and policies and procedures for safeguarding classified material; (2) audiovisual data such as recorded information on photographic records; motion picture films and microfilm developed in support of a project; recorded information on view graphs, video tapes and slides (3) documents describing meeting agendas and minutes.</p> <p>Note: This AREA is to be used for Data Item Descriptions (DIDs) and shall not be used for any other standardization documents.</p>
ATTS	<p>Automatic Test Technology Standards</p> <p>This AREA establishes standard methods, procedures, techniques and design criteria for providing automatic test capability in defense systems and equipments. It excludes automatic test equipment and accessories that are covered by FSC 6625.</p>
AVCS	<p>Avionics</p> <p>This AREA applies to all requirements pertaining to the economy of avionics operations and resources, including but not limited to process, measurement, product, interchange-ability, compatibility, commonality, interoperability, and service/allied operations. It covers all resources for electronic, electro-optic, and electromechanical systems and subsystems (hardware and software) installed in or attached to an aircraft. It includes systems that interact with the crew and other aircraft systems in the areas of: communications (c) controls and displays (ID), navigation (N), reconnaissance (RE), systems integration (SI) and target acquisition/strike (TA/S) and in the technology and functional areas of weapons delivery, identification, instrumentation, electronic warfare, flight controls, engine controls, power distribution, support equipment, sensors, transducers, antennas, processing elements, system interfaces, networks, buses, and associated software.</p>
CMPS	<p>Composites Technology</p> <p>This AREA encompasses standardization documents for materials and processing (M&P) technology that are pertinent to composites manufacturing and applications. This includes the M&P technology of fiber reinforcements and matrices used in composites manufacturing, the design and fabrication of composites, and standard test methods for determining the properties of composites and their constituent materials. This AREA includes the M&P technology of primary classes of composites materials including: polymer matrix composites (PMC), metal matrix composites (MMC), and ceramic matrix composites (CMC).</p>

AREA**TITLE (AREA Description Below Title)**

DCPS Data Communications Protocol Standards

This AREA establishes DOD protocol standards and reference protocol architectures necessary to support intranet-work and internet-work host-to-host data communications utilizing digital communications techniques. The DCPS AREA involves standardization of internet-work, peer and interlayer management protocols, including those that deal with end-to-end (host-to-host) communications across a network or a concatenated set of networks. The standardization of lower layer protocols, those that deal with the physical, data link, and network functions, do not fall within the domain of the DCPS AREA. However, the DCPS AREA actively coordinates with those standardization activities developing and coordinating those lower layer protocols to ensure that the interfaces allow interoperability.

DRPR Drawing Practices

This AREA relates to engineering practices to define, record and communicate concepts and design and production requirements in a concise, graphic form with standard symbols, abbreviations and text on drawing and associated lists.

EDRS DOD Engineering Data Reproduction Systems

This AREA covers reproduction systems required for recording, reproducing, storing, retrieving, and distributing engineering documents and related information by electronic, optical, or microform methods, or combination thereof.

EGDS Engineering Data Systems

This AREA relates to the automated processing of engineering data documentation used in support of research and development, design and engineering, procurement and supply and maintenance of defense materiel.

EMCS Electromagnetic Compatibility

This AREA covers requirements and procedures to achieve electromagnetic compatibility, within all frequency ranges of platforms, facilities, electrical and electronic systems/equipment, circuits and components. Included are: (1) standards for prediction, measurement and validation for electromagnetic compatibility; (2) standards for techniques and procedures relating to grounding, bonding and shielding; (3) standards for prevention and control of electromagnetic radiation to personnel and equipment (including hazardous materiel and substances); and (4) standards relating to the prevention of deleterious electromagnetic effects resulting from nuclear detonations (e.g., EMI and EMP).

ENVR Environmental Requirements and Related Test Methods

This AREA encompasses environmental definitions, environmental design criteria (both natural and induced) and related test and evaluation methods. The electromagnetic environment is excluded as it is covered under EMCS.

FACR Facilities Engineering and Design Requirements

This AREA covers standard general facilities engineering and design criteria, practices, guidelines, and related requirements. Specifications and Standards related to specific building products and materials are not covered by this area but in the appropriate FSG/FSC.

AREA**TITLE (AREA Description Below Title)**

FNCL Financial Data

This area covers all financial or dollar data, actual or estimated, for expenditures, forecasts, status accounting, and any other record keeping or data required by contract provisions to be expressed in financial or dollar terms. Other items covered include: (1) Documents generated for contract cost reporting, such as the contract funds status report, cost summary report, cost/schedule status report, and cost/schedule control description; (2) documentation associated with the breakdown of contractor tasks into tracking elements, such as work breakdown elements used for contract schedule and cost reporting; (3) documents associated with design-to-cost, where cost is a key design parameter and life cycle cost, which encompasses the cost of development, acquisition, operation, support and where applicable disposal. Documents include the Design to cost Plan, Life Cycle Cost Report, and Target Prices versus Actual Forecast; and (4) documents generated as a result of a value engineering program, including documents that set forth a change in contractual documents such as Value Engineering Data Report, Value Engineering Plan, and Task Change Proposal.

Note: This AREA is to be used for Data Item Descriptions (DIDs) and shall not be used for any other standardization documents.

FORG Forgings

This AREA relates to metal forging processes, procedures and technology.

HFAC Human Factors

This AREA encompasses human factors engineering, which incorporates human characteristics and considerations into design of military systems, equipment, and facilities. The HFAC AREA includes tasking requirements and technical data for analysis, design (including initial design and analysis of user tasks), test, and evaluation during acquisition. It also includes design criteria, expressed as requirements and guidelines, as they apply to those who will operate, control, maintain, supply or transport the materiel. The AREA also encompasses environmental considerations including limits for maximum exposure, human performance, habitability, and vulnerability. Manpower, personnel, and training (MPT) considerations apply only to the degree that they affect the human performance aspects of design.

INST Information Standards and Technology

This AREA encompasses report standards, data exchange format standards, graphic, and imagery constructs. It includes the structure, values, definition, and representation of data that gives it meaning, enhances information sharing and exchange, and facilitates effective decision-making based on a DoD-wide commonality of representation and understanding of specific bits of information. Standard structures and formats include character and bit oriented syntax as well as graphics, imagery, and geographical constructs. These information structure are derived from the combination and use of standard data elements and codes to convey precise meaning.

IPSC Information Processing Standards for Computers

This AREA relates to computers and data processing devices, equipments and systems including, but not limited to, character recognition types; input/output media, formats and labels; programming languages; computer documentation; flowcharts and terminology; character codes; data communications and input/output interfaces.

<u>AREA</u>	<u>TITLE (AREA Description Below Title)</u>
MCCR	<p>Mission Critical Computer Resources</p> <p>This AREA encompasses standards used in mission critical defense computer systems, related software (development environments, support software, application programs, firmware, and data bases) and associated documentation.</p>
MCGT	<p>Mapping, Charting and Geodesy Technology</p> <p>This AREA encompasses standardization documents, procedures, methods and techniques for mapping, charting and geodesy (MC&G) technology and incorporates the technologies of geographic information, photogrammetry, cartography, terrain analysis, geodetic surveying, satellite geodesy, remote sensing, and map reproduction. This includes graphic and digital MC&G aeronautical, hydrographic, topographic and target product-oriented standards (e.g., products, features, spatial data exchange, media and data quality), MC&G user oriented standards (e.g., exploitation algorithms and computer graphics) remote sensing systems standards, and MC&G sustainment standards, procedures, methods and techniques (e.g., valueadded algorithms, electronic communications, equipment, production, training, security, and distribution). Also included in this AREA are MC&G planning and requirements standards and procedures to assure achievement of forces and weapon system readiness and interoperability.</p>
MECA	<p>Metal Castings</p> <p>This AREA covers metal castings produced by a variety of processes and techniques such as: green and dry mold, shell, core, permanent and ceramic mold; expandable pattern; centrifugal; continuous and iron die-casting.</p>
MFFP	<p>Metal Finishes and Finishing Processes and Procedures</p> <p>This AREA relates to metal finishes and processes such as metallic coatings, anodic coatings, and chemical treatments and coatings. It also covers corrosion and corrosion control of metals.</p>
MGMT	<p>Management</p> <p>This AREA covers data required by the Government to manage, provide visibility, and enforce contractual requirements in the form of record keeping or deliverable products concerning project management milestones, technique, status (excluding financial and technical), milestones, problems, plans, and other data not technically or financially oriented. Documents related to management policies and concepts for particular programs or projects include Master Plan, Procedures for Determining Responsibility of Prospective Contractors, and various progress Status Reports, planning documents, and Program Management Plan. This AREA also includes documents related to the establishment and maintenance of Government property, i.e., status of condition, deficiency, and inventory. Examples of related documents are GFI Deficiency Report, Support Equipment Delivery, Schedule/Delinquency Report, and Defective Material Report. Note: This AREA is to be used for Data Item Descriptions (DIDs) and shall not be used for any other standardization documents.</p>
MISC	<p>Miscellaneous</p> <p>This AREA is reserved for those standardization documents that cannot, by definition, be assigned to a currently established Federal Supply Class, or standardization area.</p>

<u>AREA</u>	<u>TITLE (AREA Description Below Title)</u>
NDTI	<p>Nondestructive Testing and Inspection</p> <p>This AREA relates to nondestructive testing (NDT) methods of inspection, qualification of NDT equipment and personnel, and reference standards for acceptance inspection. It excludes NDT equipment and accessories.</p>
NUOR	<p>Nuclear Ordnance</p> <p>This AREA includes standardization documents covering engineering criteria, practices, requirements and items (not properly included in Federal Supply Group 11) unique to nuclear ordnance, due to design, security, quality, storage, safety or transportability requirements.</p>
PACK	<p>Packing, Packaging, Preservation and Transportability</p> <p>This AREA includes packaging, packing and preservation of defense materiel. Transportability is included whenever transportation requirements are a part of a packaging systems document.</p>
QCIC	<p>Quality Control/Assurance and Inspection</p> <p>This AREA covers general methods and techniques intended to provide assurance that material, data, supplies and services conform to established technical requirements and achieve satisfactory performance.</p>
REPS	<p>Radio-Frequency Exposure to Personnel Safety Standardization</p> <p>This AREA covers requirements and procedures for supporting activities and research required for biologically based scientific standards for safe operations of Radio-Frequency Radiation (RFR) systems to ensure environmental safety and occupational health of Department of Defense (DoD) personnel. Included in this area are: (1) biologically-based safety standards for limiting RFR exposure to personnel; (2) biological/medical aspects associated with the development of personnel exposure limits to RFR; and (3) biologically-based safety standards for limiting exposure of personnel from High Power Microwave (HPM), electromagnetic pulse (EMP), and Ultra-Wide-Band forms of non-ionizing radiation.</p>
SAFT	<p>System Safety</p> <p>This AREA related to: (1) safety design, test and demonstration requirements for military systems; equipments, facilities and personnel interfaces; (2) safety procedures; (3) joint area safety requirements and (4) system safety engineering program requirements and plans. Excluded are standards relating to explosive and fuze safety, environmental and occupational safety, and specific safety equipments.</p>
SESS	<p>Systems Engineering Standards and Specifications</p> <p>This area includes standards, specifications, methods, practices, techniques, and data requirements for analyzing, developing, and defining the technical engineering requirements for new and modified DOD systems as defined in DOD D5000.1, DOD I5000.2 and DOD 5000.2R. The area specifically encompasses procedural guidance to address those systems engineering elements contained in Program design part of DOD 5000.2-R, which includes acquisition logistics, configuration management, maintainability, reliability, and general design requirements. The area does not include Human Factors, Environmental, Quality Control, or Systems Safety.</p>

AREA**TITLE (AREA Description Below Title)**

SDMP Standardization and Data Management Programs

This AREA has been established primarily to facilitate the indexing and distribution of selected Standardization and Data Management program wide documents that do not specifically belong in any other Federal Supply Class or AREA. In addition to specifications, standards, and handbooks, SDMP includes the "SD" document series and the DoD manuals governing the programs.

SOLD Soldering

This AREA covers the processes for making metallic junctions in which the surfaces are joined under elevated temperatures by the surface wetting and subsequent coalescence of liquid solder having a much lower melting point than any of the metals being joined (generally below 426°C; 800°F). Requirements, procedures and inspection criteria for soldering processes ranging from general fabrication of non electrical assemblies to soldering electrical and electronic connections are included.

TCSP Technical Support

This area includes technical documentation not encompassed by the MGMT area relating to facilities, cataloging, property control, contractor engineering technical services, and acquisition.

Note: This AREA is to be used for Data Item Descriptions (DIDs) and shall not be used for any other standardization documents.

TCSS Telecommunications System Standards

This AREA establishes uniform engineering criteria for terminal equipment, transmission equipment, and switching equipment to ensure interoperability within military telecommunications systems and, in many cases, interoperability with federal systems and common carriers. Activities within the TCSS AREA include participation in federal, commercial, and international standard forums, as well as development of military-unique telecommunications standards and handbooks. The TCSS AREA includes communications systems in support of computer data transfer, as well as the more conventional telecommunications services such as voice, video, and facsimile. The TCSS AREA applies to services provided over a broad spectrum of transmission media and under widely varying environmental and physical conditions.

THDS Screw Threads

This AREA establishes standards for screw threads and other items associated with the purchase and/or use of interchangeable threaded parts, including basic requirements for assembly, interchangeability, strengths and installation/removal torques.

THJM Thermal Joining of Metals

This AREA is concerned with the thermal joining of metals processes (welding and brazing), but excludes soft (low temperature) soldering (see SOLD AREA). It includes low temperature brazing (also known as hard soldering or silver soldering). It does not include equipment or accessories.

AREA

TITLE (AREA Description Below Title)

TMSS Technical Manual Specifications and Standards

This AREA covers the requirements for technical manual preparation, including those requirements to facilitate TM deliverables in digital format. It addresses the technical content and format of weapon systems, weapon systems components, and support equipment technical manuals used for operation, maintenance and repair of systems and equipment. Document Type Definitions (DTDs) and Format Output Specification Instance (FOSI) developed as appendices to the TMSS documents are also covered by this standardization AREA, as well as administrative and management data such as status reports, validation plans and schedules relating to technical manuals.

NOTES:

1. AREA TELE, Federal Telecommunications Standards, is used for DODISS indexing purposes only. It is not a DoD standardization AREA assignment.
2. SLHC and TCTS have been merged into one area - TCSS.

DATA ITEM DESCRIPTION APPROVAL AUTHORITIES

All DIDs must be reviewed in accordance with MIL-STD-963B, Preparation of Data Item Descriptions. DIDs should be submitted to the appropriate approval authority listed below. **Contact information may be found in the appropriate section of this directory.** Approval authorities will forward approved DIDs to the Department of Defense Single Stock Point in portable document format for indexing, printing, and distribution using the ASSIST Electronic Document Submission tool discussed in Policy Memorandum 99-3, dated October 14, 1999, available at <http://www.dsp.dla.mil/policy/99-3.htm>. The DoDSSP will issue AMSC and DID numbers to all approval authorities, as they must continue to report on the burden hours for all DIDs. Call or e-mail your request for numbers to Rick Rodemer at (215) 697-5164 or via e-mail at rick.rodemer@dlamail.mil.

The following DID approval authority offices are listed in this directory in their appropriate Service/Agency sections.

PART 1

STANDARDIZATION MANAGEMENT ACTIVITY (SMA) LIST

This index shows DOD SMAs and other interested organizations that participate in the conduct of the Defense Standardization Program. These activities function as lead standardization, participating, and review activities or departmental custodians as defined in the DOD 4120.24-M "Defense Standardization Program Policies and Procedures". To facilitate use of Part 3 of this directory, this part is primarily sectionalized by Military Department, Defense Agency, and other elements of the Federal Government.

PART 2

STANDARDIZATION ASSIGNMENTS

This part assigns the Lead Standardization Activities and Participating Activities for Standardization Areas, Federal Supply Groups (FSG), and Federal Supply Classes (FSC). It also identifies the item reduction activity for each FSC. See DoD 4120.24-M, "Defense Standardization Program Policies and Procedures" for an explanation of assignment functions.

PART 3

POINTS OF CONTACT

This part provides the names, addresses, and phone numbers for standardization points of contact in the DoD, civilian agencies, and non-government standards bodies. In addition, this part identifies the Standardization Areas and FSCs in which DoD SMAs and civilian agencies have an interest and should review standardization documents and item reduction studies. See DoD 4120.24-M, "Defense Standardization Program Policies and Procedures" for the procedures and extent of document coordination.

SECTION I

OFFICE OF THE SECRETARY OF DEFENSE

Information listed should be current at the time of publication. All changes, additions or deletions of the activities' addresses, telephone numbers, points of contact (POCs) and other data for this section should be submitted, as mark-up copy, to the address listed herein for "SO."

**Executive Agent for the Defense Standardization Program

NOTES: Acts as Focal Point for the Preparing Activity where
"DLA-CT" is shown in the FSC listing of the DODISS.
Initiates projects, prepares, coordinates and maintains
standardization documents. Interacts with all technical
matters pertaining to preparing activity responsibilities
(preparation, coordination, resolution of comments, and
approval of standardization documents). Involved in
all matters pertaining to specification preparation,
coverage document review, accomplishment data, item
reduction studies, and commercial item descriptions
(CIDS). Responsible for transmittal sheets and reports on
standardization projects for the SD-4. Monitor (DD Form
1585) and DODISS and ASSIST program information.

*1. Director
The National Geospatial-Intelligence Agency (DEPSO)
Attn: ETAS, Mail Stop P-24
12310 Sunrise Valley Drive
Reston, VA 20191-3449

NOTES: NIMA provides overall program guidance and management for all DoD mapping, charting, and geodesy (MC&G) resources and activities. The agency provides the US principal representative to the NATO Interservice Geographic Working Party (IGEOWP) and develops the US position on proposed new/revised NATO Allied Standardization Agreements (STANAGs) dealing with (MC&G) and related matters. NIMA is the coordinating activity for NATO Allied Publications under the purview of the IGEOWP. The agency has similar responsibilities under the ABCA Quadrupartite Standardization Program and chairs the ABCA Special Working Party/Mapping, Charting and Geodesy (SWP/MC&G).
